

DESIGN FOR CONVERSION OF M/V SKANDI HAV

We have been assigned a contract by DOF Management AS, Bergen, Norway for the design of the conversion of 1983 built Offshore Supply Vessel M/V SKANDI HAV into an Offshore Terminal Support Vessel.

The design for the conversion was performed during 2008/2009 and the conversion was performed during summer 2009. After the conversion M/V SKANDI HAV is now operating for Petrobras in Brazilian waters with maintenance of the offloading hose lines to FSOs, FPSOs and tankers.

Maritime Technology AS offers, among others, the following services:

- Project Management
- On-site Supervision
- Mechanical Engineering
- SOPEP plans
- Strength Calculations
- Conversion and repair specifications
- Cost Control
- Naval architects
- Noise Measurements and Calculations
- Stability and Motion Calculations
- Inclination tests and Reports
- Newbuilding design
